- Health Care
- Medi Care

Specifications

Width	400 mm
Length	445mm
Height	810mm ~ 1,115mm
Weight	16 kg

Patented Eccentric Motion Stimulation

Through the Motor rotation movement, the vibratio is transmitted to the patient's body through the cable and the accessories of the head. The high tensile cable reduces the burden on the user.

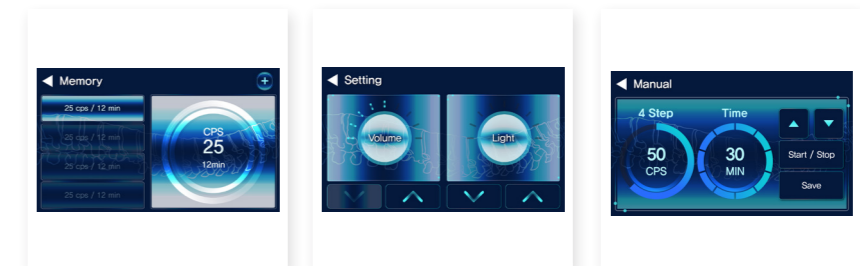

Accessories

- A type**
Hard areas such as the soles of the feet
- B type**
Spine and back muscles
- C type**
Trigger point
- D type**
Normal skin
- E type**
Thighs, arms, shoulders, neck
- F type**
Weak areas such as the head
- G type**
Cervical spine
- H type**
Applicator and Vibration Connector

Function

- Touch Screen**
First application of 5-inch full touch screen through UI/UX improvement
- High Technology**
The patented eccentric rotation axis minimizes the burden on the operator's body
- Ergonomic Design**
Ergonomic design that adjusts the height and reduces the burden on the user's wrist

- Pattern saving function**
Four memories can be saved sequentially
- User-friendly Setting**
The brightness of the LCD screen and the volume of the voice can be adjusted easily
- 7 Level CPS**
7 levels (up to 70 CPS) of vibration frequency and timer up to 30 minutes
